#### Appendix

### **On-site/Off-site Monitoring Guidance**

#### **Summer Food Service Program (SFSP)**

In response to State agencies and sponsoring organizations implementing innovative solutions to conduct off-site reviews and provide oversight of the SFSP during the public health emergency, FNS has developed the following guidance for conducting off-site monitoring. The review must take place at the sponsor's or site's location, though portions may be conducted at the State or sponsor's office, informally known as the 'desk review' or 'desk audit' portion. There may be a combination of reviews conducted to complete the Program review. For instance, the State agency monitor may evaluate the sponsor's single audit, budget, and training attendance via desk review and conduct the balance of the evaluation of the institution's Program on-site. Please note that these on-site and off-site strategies apply to both congregate and non-congregate meal service options.

#### **Tips and Best Practices:**

- 1. Plan ahead and communicate.
- 2. Develop a standard process.
- 3. Consider feasibility of a hybrid approach
  - a. Obtain documents through a secure platform to ensure personally identifiable information is secure.
  - b. Conduct the exit interview via video conferencing as an off-site approach.
- 4. Develop checklists and tools to ensure operators are aware of on-site and off-site review requirements and documentation submission procedures.
  - a. Request additional information as needed to resolve issues found in the off-site portion.
- 5. Document any off-site elements of the review.
- 6. Practice using a secure file sharing platform among staff before conducting a review.
- 7. Evaluate your established review standard procedures and make modifications to reflect latest learned strategies.
